

# School Council Meeting

December 12, 2023

## HVAC Project

- Goal is to complete project over winter break. HVAC systems on the East side of the building will be replaced and brought inside the building.

## Security Improvement Projects

- Working with a local company to improve our security system to maintain industry standard. This will include crash bars on all doors, replacing some older doors and windows as installation of AED systems and other updates that support the safety of our students.

## Dress Code

- There will be a school wide goal of a more consistent approach to dress code enforcement. Homeroom teachers will be communicating any compliance issues over the first few weeks of school after Christmas break as we work to update the written dress code to have more specific guidelines for our families.

## 3<sup>rd</sup> quarter Club Plans/Ideas

- Starting in the 3<sup>rd</sup> quarter we hope to make available several after school club options for our students. Look out for more information to come. Please let us know if you have any club ideas and/or are willing to sponsor a student club (parents must be VIRTUS training to volunteer.) All clubs will be held on school property and will run on Thursdays from 3:30 – 4:30 p.m. through the beginning of March.

## Expectation Matrix

- With the help of school staff we are working on creating a School Behavior Expectation Matrix. The matrix will involve expectations for our students that will be focused on student behavior that is consistent and enforced while on school property.

## Strategic Plan

- The School Advisory Council will continue to work with stakeholders to improve and continuously update our current strategic plan making it more transparent for both school families and staff. Communication and transparency are our goals.

## St. John School Advisory Council future dates and communication

- Be on the look out for more information on how you can attend future School Advisory Council meetings.
